## EXPERIENCE

---

### Tic-tac-toe

I recreated the classic tic-tac-toe game with a responsive design.

- I deepened my knowledge in **React**.
- I managed to master the concept of **useState**.
- I put **local storage** into practice for data persistence.

### Portfolio

My personal portfolio was the first project I carried out applying my knowledge of **React** and how other framework-agnostic libraries like **EmailJS** work.

- I put my **React** knowledge into practice.
- I used the **useRef** hook to work with the EmailJS library.
- I successfully created a contact form that sends messages from potential recruiters directly to my personal email using the **EmailJS** library.
- I created a fully **responsive design** for mobile devices.

## EDUCATION

---

### Universidad Mariano Gálvez de Guatemala

Feb 2022 – Currently

- I developed my programming logic with **C++** during my first year of university, which includes variables, statements, control structures, and everything that involves the most basic aspects of programming
- I created several programs for my first year of university using **Java**, including a length and temperature unit conversion calculator.
- A system that simulates an invoicing program connecting to a local database built with **SQL Server**.
- A tic-tac-toe game that is played from the console using **C#**.

### C.E.C Fuente de Vida

Jan 2020 – Oct 2021

- Graduated with a bachelor's degree in science and letters, specialized in electronics and digital devices.

## SKILLS

---

- |                                  |                     |                                |
|----------------------------------|---------------------|--------------------------------|
| ▪ <b>Technical/basic english</b> | ▪ Respect           | ▪ C++                          |
| ▪ Responsibility                 | ▪ HTML5             | ▪ Java                         |
| ▪ Dynamism                       | ▪ CSS3              | ▪ C#                           |
| ▪ Proactivity                    | ▪ Responsive design | ▪ SQL Server (Basic knowledge) |
| ▪ Quick learning                 | ▪ JavaScript        |                                |
| ▪ Teamwork                       | ▪ React             |                                |
| ▪ Punctuality                    | ▪ Git and Github    |                                |
| ▪ Honesty                        | ▪ Vite              |                                |
|                                  | ▪ VS Code           |                                |
